

Zachary Ma

SOFTWARE ENGINEER | QUALITY ASSURANCE | DEVOPS

Belmont, CA | zachary007@gmail.com |

GitHub: <https://github.com/Area-Turtle> | LinkedIn: <https://www.linkedin.com/in/zachary-ma/>

SUMMARY

QA Engineer with 4+ years of experience testing web applications and building automated tests. Hands-on with JavaScript, Cypress, Selenium, Postman, JMeter, APIs, GitHub Actions, and CI/CD. Comfortable troubleshooting software issues, working with developers, and building test automation projects using JavaScript, Python, and Java.

EXPERIENCE

Rhombus Power — Quality Assurance Engineer | Palo Alto, CA | Apr 2022 – Dec 2025

- Tested web applications used in U.S. Department of Defense environments, focusing on functionality, reliability, security, and regression testing.
- Created and maintained manual UI test cases, increasing test coverage by approximately 40%.
- Built automated tests with Cypress/Javascript and used JMeter for API and performance testing, increasing regression coverage by approximately 45%. Reduced repetitive manual testing time by approximately 20% through test automation.
- Investigated and reproduced software defects, worked with developers and data engineers to identify issues, and verified fixes.
- Used Jira, GitHub/GitLab, Smartsheet, and Agile/Scrum workflows to track defects and testing work.

Sandbox VR — Guest Experience Guide | San Mateo, CA | Jan 2019 – Jul 2020

- Troubleshoot VR hardware, software, networking, and system issues in a live immersive entertainment environment.
 - Diagnosed and resolved technical issues while maintaining reliable customer-facing experiences.
 - Communicated technical issues and troubleshooting steps clearly to team members
-

PROJECTS

OWASP Juice Shop — Cypress Automation | JavaScript, Cypress, Node.js, GitHub Actions

- Developed a JavaScript/Cypress test automation framework with reusable page objects, test data, and automated UI validation across browser environments.
- Integrated automated test execution into a GitHub Actions CI/CD pipeline for repeatable regression testing.

The Internet — Selenium Automation | JavaScript, Selenium, Node.js, GitHub Actions

- Developed a JavaScript/Selenium WebDriver automation framework with reusable browser setup, validation, waits, and test utilities.
- Integrated automated tests with GitHub Actions CI/CD to support consistent test execution and reporting.

Restful Booker — API Testing & Web Application | JavaScript, Cypress, Postman, Express, Newman, GitHub Actions

- Developed a JavaScript/Cypress API test framework covering authentication and booking CRUD operations.
 - Built a JavaScript/Express frontend and used Postman/Newman to validate backend API functionality.
 - Integrated automated API tests into GitHub Actions CI/CD for continuous regression testing.
-

EDUCATION

San Francisco State University — B.S. Computer Science, Minor in Mathematics | San Francisco, CA | 2016 – 2021

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, Swift, SQL, TypeScript | **Testing:** Cypress, Selenium, Postman, Newman, JMeter, API, UI, Regression | **DevOps / Cloud:** GitHub Actions, GitHub, GitLab, Docker, Kubernetes, AWS, CI/CD, Linux | **Development:** Node.js, Express, React, REST APIs, HTML, CSS, Git | **Tools:** Jira, Confluence, Smartsheet, VS Code, Agile/Scrum

Certificates

Software QA & Test Automation Engineering Specialization — Coursera | 2026

IBM Applied DevOps & DevOps Software Engineering Professional Certificates — Coursera | 2026

ISTQB Certified Tester Foundation Level (CTFL) — In Progress
